

Introduction to SEER Associates

SEER Associates was established to provide state-of-the-art **S**afety, **E**nvironmental, and **E**mergency **R**esponse services to industry and Government and to do this in a timely and cost effective manner.

Our professionals have successfully completed projects in support of some of the world's largest and most challenging oil and gas projects. Our aim is to:

- Produce work of the highest quality.
- Develop user friendly products adapted to specific project characteristics, locations, regulatory environments and the client's operating systems.
- Involve client personnel in planning to effect buy-in and facilitate start up and operations.
- Participate in client training programmes.
- Provide clients with ongoing support and information.

SEER Associates Team

The SEER team consists of senior consultants with many years of practical experience in the oil and gas and other industries both on land and in marine environments.

This team is ready to apply their knowledge and experience to client needs and to impart that knowledge to client staff.

The training of client staff in order to achieve client company self-sufficiency is a cornerstone of the SEER Associates approach.

Projects have included the Sakhalin Energy Investment Company (SEIC) Phase II and the BTC Pipeline System

Range Of Services

SEER Associates provides a full range of services to clients, from assistance in project design and permitting, construction, training, start up, operation, and decommissioning.
